American Colonials.

References are to Crosby's "Early Coins of America" with varieties as given by him

223 1652 Oak Tree Shilling. 9-H. The obverse very fair, the tree and greater part of legend distinct. Reverse with date, nearly fine. The edge is slightly clipped as are nearly all of these early pieces, partly for the sake of gain and partly to regulate the value after the piece was struck. One of the large shillings. Rare.
224 1652 Pine Tree Shilling. 1a-C. One of the large shillings that closely followed the Oak Tree coinage. A *very fine* and most desirable unclipped specimen. Rare.
225 1652 Pine Tree Shilling. 13-S. A very good, nearly fine, specimen of the small shillings. Shows the clipping in a very slight degree evenly around greater portion of edge but legends barely touched. Rare.
226 1652 Pine Tree Sixpence. 1-A. Obverse, fair; reverse, nearly good. Rare.
227 1652 Pine Tree Threepence. 1-A1. Very fair or good specimen of this little rarity.
228 1652 Pine Tree Threepence. 2b-B. Crosby gives this piece as rarity 6, the only specimen he had secured being much worn. This piece shows scarcely a trace of circulation, the reverse being sharp. The obverse die, however, was evidently very weakly cut, nearly all the letters double and the second T wanting left portion of top. It was evidently rejected for this reason after but few were issued. The tree is sharp as are also nearly all the inner grains and part of legend. The rest of obverse is so weakly struck as to be nearly indistinct. The finest and probably this and the specimen mentioned by Crosby are the only pieces of this variety known.
